

Inspiring Science

Covance Clinical inspiring science provides cutting-edge counsel and a sounding board for strategic development plans. Our scientific team is dedicated to furthering innovations in science and brings that same passion to their therapeutic areas. Discover our solutions within inspiring science, as well as our expertise by therapeutic area.

Solutions

Product Development Consulting Group

This group bridges the gap between science and business to accelerate product development. Specialists, who are both scientists and experienced drug developers, guide our teams through the rapidly changing scientific and regulatory frontiers to maximize the value of an asset, extending patent life and maximizing asset value for the sponsor.

Precision Medicine

Enterprise-wide expertise in both diagnostics and drug development support any development need in the area of targeted therapy.

Dedicated Biomarker Solution Center

Our Biomarker Solution Center is a leader in biomarker applications, driving innovative precision medicine therapies.

Cell and Gene Therapy

With specialized expertise, coordinated capabilities and focused investments across non-clinical, clinical and post-approval phases, we can help reduce the time and risk in product development. We have supported the development of both FDA approved CAR-T therapies and helped advance the first two FDA approved gene replacement therapies.

Therapeutic Area Expertise

NASH

Covance is the leading CRO in NASH having the largest informative knowledgebase of NASH sites worldwide, including randomized and biopsy-confirmed patients, modern diagnostic test results and comprehensive clinical experience from early strategic planning to full clinical development. Our Liver Therapeutic Area Head is an internationally recognized leader in NASH clinical research and author of highly cited review articles published in prestigious scientific journals.

Rare & Pediatric

We have a unique combination of dedicated rare disease and pediatric expertise and comprehensive cross-functional operational support. We have a robust study planning team and execution strategies that anticipate regulatory hurdles and make patient centricity an integral part of the path forward to accelerate patient identification and recruitment.

Oncology

We have an oncology team comprised of medical, regulatory and operational professionals with extensive drug development expertise across tumors and therapies. These include CAR-T, genomics, biomarkers, companion diagnostics and adaptive trial design.

Diabetes & Related Complications

Covance is a leading CRO with pioneering enterprise solutions in clinical development for Type I and Type II diabetes and chronic complications of diabetes including cardiovascular diseases, nephropathy and retinopathy. Our Therapeutic Area Head for diabetes and metabolic disorders is an internationally recognized endocrinologist who co-edited the recent comprehensive 5th edition of the popular Textbook of Diabetes (Wiley Blackwell).
