

Intelligent Recruitment

Covance Clinical intelligent recruitment can minimize study costs, speed time to market, and increase forecasting accuracy by selecting the most ideal sites for a particular study that correspond to clusters of eligible participants. Only Covance has timely, real-world LabCorp diagnostic lab result data, global Central Labs investigator performance data and patient intelligence input that provides unique insights that enable us to deliver faster patient enrollment and enhanced patient retention. Discover the various products and services that deliver intelligent recruitment for your studies.

Protocol Optimization

Protocol Design Tool

Our Protocol Design Tool helps us design studies with greater certainty. It allows us to understand the impact of each inclusion or exclusion criteria against the patient population to assess the number of patients that meet study criteria. It allows for proactive planning and modification of protocol criteria to maximize the patient pool with the least amount of changes – or ensures accurate planning if modifications are not possible.

Patient Intelligence Database

Our proprietary global Patient Intelligence Database provides insights that help us fit the protocol to the patient because we understand specific criteria that motivates or prevents patients from participating and completing a study.

Recruitment Optimization

Protocol Design Tool

Our Protocol Design Tool can pinpoint geographic clusters of people who fit a study's eligibility criteria.

Site List Tool

Our Site List Tool identifies high-performing sites and countries based on factual trial performance data in the indication or therapeutic area under evaluation.

Patient Direct

Our direct-to-consumer recruitment model supplements investigators' databases/records to enhance recruitment potential.
